The voter so receiving his ballot, marked it at the marking shelf, and then deposited it in the box as the law directs. The name of each voter so casting a ballot was announced in a loud and distinct tone of voice and checked upon the check-list by the officer in charge of said list.

*Article 15.* The Committee chosen at the meeting in November to look over the survey of the Warren Road, so called, and get an estimate of the cost of building the same, made a verbal report. They had found it impossible to get a definite statement from any one, as they had no specifications to go by. Mr. McClellan of Grafton thought a good road might be built there for \$500.

A motion by Mr. Eben T. Hall that the Town appropriate five hundred dollars (\$500) to build the Warren Road was lost.

Voted, to pass over the article.

#### TRAMP NUISANCE.

*Article 20.* Mr. Edward E. Whiting, Clerk of the Board of Overseers of Poor, said in part, that we had the honor of lodging 788 tramps the past year, one hundred more than the year before, which was highly complimentary to us as entertainers; he thought something ought to be done to reduce the number another year. As he understood the law, they might be detained until 11 o'clock A. M., and it had been suggested that we might have some wood for them to saw or some stone to break.

Mr. Madison C. Harvey said he had twenty years' experience in managing Town Farms and putting up tramps. He thought that to have a few arrested and send them down to Bridgewater would reduce the number.

Mr. Alonzo C. Southland thought two cords of wood would be enough this summer, and he would see that they sawed wood.

Voted, that it be left in the hands of the Overseers, they to do what they thought best.

#### COBBLER SHOP.

*Article 25.* Mr. LeSure, Janitor of Town Building, said in part, that there was a great deal of fault found because there was no piano in the hall, that members of the Grand Army of the Republic, on Memorial Day, had to bring one over from their hall, that the Principal of the High School had hired one this winter and kept it in the hall for the school entertainments and graduation exercises.

Voted, that the Town appropriate the sum of two hundred dollars (\$200) to purchase a Piano for the Town Hall.

## STEAMER HOSE.

*Article 24.* Voted, to instruct the Fire Engineers to purchase 600 feet of Hose for the new Steam Fire Engine.

Commonwealth of Massachusetts.

WORCESTER, SS.

In pursuance to the foregoing Warrant, the inhabitants of the Town of Upton, qualified to vote in Elections and in Town Affairs, met in the Town Hall, in said Upton, on Tuesday next after the first Monday in November, it being the fifth day of said month, in the year one thousand nine hundred and one, for the purpose of giving in their votes for State and County Officers.

The meeting was called to order at nine o'clock in the forenoon by the Town Clerk, who then read the Warrant and the officer's return thereon.

The specimen ballots and cards of instruction were posted as the law directs, the ballot-box furnished by the Secretary of the Commonwealth to be used at elections, was then opened in public meeting and shown to the voters present to be empty; the register of the box being set at 000, the box was then locked and the keys thereof delivered to Alonzo C. Southland, Constable in attendance at said meeting.

J. Frank Despeaux, Walter W. True and Thomas J. Gorman were duly

sworn to faithfully perform the duties of Ballot Clerks and Tellers, by the Town Clerk.

Roger Shaughnessy and William F. Parshley were duly sworn to faithfully perform the duties of Inspectors and Tellers, by the Town Clerk.

A package said to contain 600 official ballots, issued by the Secretary of the Commonwealth to be used at this election, was delivered to William H. Wellington, presiding officer, and his receipt therefor given to the Town Clerk.

William H. Walker, Herbert M. Buck and George F. Prentiss were duly sworn to faithfully perform the duties of Tellers, by the Town Clerk.

All of the above Election Officers were appointed by the Selectmen as the law directs.

The seals of the package of ballots were then broken and the blocks of ballots delivered to the Ballot Clerks.

The polls were declared open for the reception of ballots at 9.15 A. M.

At 11.04 A. M., by the unanimous consent of the election officers, the ballot-box was opened, it registered 202, and one hundred ballots taken therefrom; also at 1.55 P. M. the ballot-box was again opened, it registered 452, and one hundred fifty ballots were taken therefrom for the purpose of counting the same.

*Article 3.* Motion that the Town adopt the provisions of Chapter 482, Acts of 1901, was declared lost. It being doubted, the Moderator called for two

*Article 4.* Mr. Benjamin A. Jourdan, who was a Selectman about the time that Misquoe Hill Road was re-opened in 1878, said in part, that he consulted Peter C. Bacon of Worcester (who at that time was considered as good authority as there was in Worcester County on roads). He said that the road was a bridle path, that it was never laid out by the Selectmen of Upton, that we had no record of it, and that we could not discontinue it only through the County Commissioners.

Voted, that the Town appropriate one hundred dollars (\$100) to repair Misquoe Hill Road.

Voted to dissolve so much of the Warrant as relates to Town Affairs.

Due notice having been given, the polls at 4 P. M. were declared closed.

# REPORT OF OVERSEERS OF THE POOR.

In presenting their Annual Report the Overseers of the Poor wish to call attention to a few facts which do not appear fully in the several accounts which follow.

A comparison with last year's report shows a large decrease in valuation of Personal Property at the Town Farm, mainly due to the small amount of ensilage put in silo last fall.

The farm products sold exceed last year by more than \$500; the quantity of milk and cream having been increased about \$350.

Superintendent Lindley M. Stuart's illness and death is deeply regretted, believing him to have been a man capable of producing the best of results from the farm.

The expense of Outside Support has been unusually heavy, as there have been several new cases this year, and one old case, for which no reimbursement was made.

In regard to Care of Tramps, under the old system, last year, nearly 800 were lodged and fed, at a cost of 15c. each. This year, during eleven months under the wood-sawing system, there were 209, at a cost of 45c. each, which includes care, tools and shed built. The actual cost has not been greatly decreased; but the nuisance has been noticeably abated, and it is recommended that tramps continue to saw wood in return for food and lodging.

## ATTENDANCE.

The per cent. of attendance is lower this year than last. The falling off is due to a large amount of sickness during the winter months and to more stringent regulations in regard to keeping the attendance records. These regulations make it necessary to keep a pupil's name on the register and to count him as a member until ten full days of absence have elapsed. Under the old regulations his name was dropped after five days of absence. While the new regulations tend to decrease the per cent. of attendance, they give a more accurate record of the real attendance and membership. The attendance for the current school year has so far been unusually high, and bids fair to be the highest for a number of years.

## WORK OF THE YEAR.

The work of the school year ending June last was in many respects very gratifying. The High School reached a degree of efficiency never before attained. This was due in a large degree to the able management and wise instructions of an interested and intelligent corps of teachers. In the Elementary Schools progress was made. The teachers were alert and willing to move forward, and the pupils were willing to follow their leaders. The spirit of cheerfulness and work was manifest in nearly every room, and where such a spirit is present there must necessarily be good results.

With the beginning of the new year in September came a number of changes.

## HIGH SCHOOL.

The entire teaching force in the High School was new. It is a difficult matter to take up the work under these conditions. That a loss must result from such a change no one will deny. The aim should be to reduce such loss to a minimum by a wise choice in renewing the teaching force. I think that under the circumstances the Committee was fortunate in securing the teachers now in charge of the school.

## ELEMENTARY SCHOOLS.

In the elementary grades the teaching force, with one exception, remains the same as for the school year 1901. The teachers, almost without exception, are progressive, conscientious and painstaking in the management and the instruction of their schools. The grades in the High School building have never before been in such good condition. While the ideal in all the schools is far from being attained, yet, with the means at the disposal of the Committee, it is safe to say the town is getting full value for the money expended for the schools.

## THE COURSE OF STUDY.

Few changes have been made during the past year in the Course of Study.

The work in number for the first four grades has been put upon a more rational basis. The benefits of such a change are manifest in the greater interest which the children take in number work. When the teachers see a little more clearly what the true nature of number is it will be possible to obtain still better results. The aim of the course in number is to bring the work within the power of the child and to do away, so far as advisable, with the endless, monotonous, mind-deadening drill which has characterized the teaching of number, which takes for its basis the so-called Grube system. To keep a child drilling for six months on the combinations from one to five, when he knows and uses every day a far greater range, is unpedagogical to say the least.

## SPELLING.

The work in spelling has been improved by the introduction of the Blaisdell Speller, an excellent book, containing a well and wisely-chosen list of words. The words are such as the child needs and uses, and therefore such as he needs to know how to spell. Too many of the spelling books now in use are built upon a plan similar to that of the old arithmetics, which were filled with useless problems; in like manner these irrational spelling books are filled with words worse than useless to learn to spell. Out of the more than three hundred thousand words in the English language, a person uses and needs to know how to spell about five or six thousand. It is evident that there is room for a wise choice in the selection of this number.

## WRITING.

There has been some improvement in the writing during the year. It is to be hoped that when the desks in the different rooms are such as may be adjusted to the size of the pupils that a further improvement will be noted. With the desks now in use in most of the rooms it is impossible for the pupils to sit in correct positions while writing, and as success in writing, especially vertical writing, is almost wholly a matter of position, with improper desks the conditions for success are not present. The introduction of desks with adjustable castings will have a marked influence upon the quality of the writing.

## RECOMMENDATIONS.

## A UNIFORM SCHOOL DAY.

1. It seems to me that it is desirable to have the School Day uniform throughout the year. Under the present arrangement the schools close at 3.30 P. M. for two or three months in the year, and at 4 P. M. during the other months. I would suggest that the day be made uniform by closing the schools at 3.45 P. M. throughout the year. By this arrangement the changes now necessary at the beginning and at the end of the short session period would be obviated. In this latitude there are few,

if any, days in the year when there is not sufficient light to work until 3.45 P. M.

#### CERTIFICATE PRIVILEGE.

2. In order that the Certificate Privilege for entrance to college may mean something, and may not be lost through the certification of poorly prepared and indolent pupils, I would suggest that no graduate of the High School be granted a certificate for admission to any college or technical school who has not attained the rank of "Good" as a minimum in each of the several studies pursued during the course, with an average of "Very Good" for all studies.

#### ADMISSION OF NEW PUPILS.

3. I would advise that pupils who are entering school for the first time, be admitted to the first grade only during the month of September. Under the present arrangements they are admitted in September and in February. This change would, to a large extent, do away with the crowded condition of the First and Second Grade rooms; for the pupils who enter school in February are, with the present system of yearly promotions, obliged to remain in the First Grade a year and a half. Unless there can be a system of half-yearly promotions throughout the grades, pupils cannot be admitted oftener than once a year to the First Grade without causing undue congestion therein.

#### CHANGE IN THE AGE OF ADMISSION.

4. I wish again to bring to your attention the advisability of changing the age of admission to the first grade of the elementary schools from five to six years. Five years is much too young for a child to begin the work of the regular primary school. From attendance at this age more harm results than good. If he gains at all in mental development it is at the expense of physical development. The time of the child up to the age of six or seven should be spent in gaining a strong, straight back and sound, well-developed lungs; in short, a healthy body, upon which

may be built a symmetrical mental and moral structure. The great majority of our sister states set the age of admission to the public schools at six years. The child who enters school before the age of six years should, in eight cases out of ten, repeat the work of the first year. Oftentimes it is necessary to send him on to the next class because the influx of new pupils crowds him out of his proper place. Had such a pupil not entered school until he was a year older, he would undoubtedly, owing to the greater maturity of his mind, been prepared to take up the work of the second year. It is not only wrong to compel a child to attend school two years when, if started aright, he could do the work in one; but it is also false economy, for the town to pay for nine years of schooling when, if the child were admitted at the proper age, he could complete the work of the elementary grades in eight years or less.

#### REPAIRS.

5. The outside of the building at the Center, the hallways of the building at West Upton, and the trimmings of the High School building are much in need of being painted. It would give a more cheerful and tidy appearance to the rooms of the last mentioned building if the radiators, steam pipes and registers were rebronzed.

Adjustable castings are much needed for the pupils' desks and chairs in the room occupied by the higher grades at the Center and in the room occupied by the Fifth and Sixth Grades at the High School building.

The tops of many of the desks in the different rooms throughout the town should be smoothed and revarnished. It is a great temptation, from the force of example, for a pupil to further mark a desk which has already been disfigured. This bad habit is gradually dying out of the schools. It will be a great aid toward correcting what traces of it still remain to have the desk-tops fresh and clean.

#### CONCLUSION.

In my work for the schools of Upton, which has covered the better part of three years' time, I can see that progress has been

made in several lines. Whatever progress has been made is due, in large measure, to the faithful and earnest efforts of the teachers, to the wise and careful management of the School Committee, and to the liberal and loyal support of the citizens of Upton. In such an atmosphere it is a pleasure to work.

Respectfully submitted,

W. H. HOLMES, JR.

#### REPORT OF THE PRINCIPAL OF THE HIGH SCHOOL.

*Mr. Wm. H. Holmes, Jr., Superintendent of Schools,*

DEAR SIR:

The standing of a high school in scholarship, in athletics, in spirit, and in character, is so dependent upon the two upper classes that we could almost believe that the success of a school is proportional to the number of its Juniors and Seniors. Every year in school makes a boy more earnest in his work, more ambitious for his future; and he realizes in that deeper sense the efforts of his parents and teachers. Every parent then should remember that any high school course less than four years is not intended to make students, but to make room for students.

The teachers this year feel somewhat handicapped by the absence of the older scholars, for more than half the pupils in school are Freshmen. This, of course, makes the standing of the school different from the last few years, and the only just comparison one can make of what is really being done is by visiting the classroom and seeing the work. To this we not only welcome you, but feel it your duty as parents.

The standing of the school in written composition, in speaking, and in all branches of English, is far below the average, and not until this finds its true place, at the top, can we hope or expect the best results. Chemistry, Latin and History may be "Golden," but English is "Divine."

This year we are striving to give English its true position. Composition and written work are called for in every subject,

and often the papers are read before the class by the teacher, who endeavors to bring out the mistakes so the pupils themselves may observe them and suggest corrections.

In History we try to impress upon the class not that we should know the past for itself, but that we should know the past in order to understand how the present came to be.

Our Latin teacher, a thorough English student, requires not only the thought, but the thought expressed in the best English. "It is not enough to know what is right," she says, "you must be able to tell what you know."

In the Scientific department we aim at individual work and exactness.

We wish to thank our School Board and Superintendent for their interest in us, and for their valuable suggestions. Mr. Aldrich, our faithful janitor, is deeply interested in the school, and we thoroughly appreciate his help.

Thus far the work has been pleasant and encouraging; the teachers work in harmony, and there is the best of feeling between student and teacher.

I am, with respect,

WM. MIDDLETON MARR,

*Principal.*

Upton, Mass., Jan. 25, 1902.

*Mr. Wm. H. Holmes, Jr., Superintendent of Schools,*

DEAR SIR:

The work in Music and Drawing during the past year has been unusually successful, partly owing to the fact that fewer changes have been made in the teaching force.

The same general plan as outlined in my last report has been followed, the details of which the teachers have, without an exception, been faithful in endeavoring to carry out.

In the four upper grades a greater improvement in both spirit and quality of work has been shown this year than ever before. The teachers have realized the importance of the work of these

grades, and have been zealous and untiring in their efforts, not only with the pupils, but in their own preparation as well.

On the part of the pupils we have found an improved disposition to meet the requirements in regard to neatness and accuracy in the drawing, and in many instances results have been secured that were better than we had reasonably expected.

In my report of last year I advised a change of music readers for the upper grades, for one reason, owing to the worn out condition of those in use. It is needless perhaps to say that these books have not improved with a year's usage, and much further work with them is impossible. New books are also needed in the fourth grades and High School.

The matter of voice-training has received its usual share of attention, and special effort has been made to secure a sweet, light quality of tone. Individual work in intervals and sight-reading has also been continued with good results.

Music in the High School is steadily progressing, a fact which is due in no small measure to the continuance of daily practice. Even though but few moments can be devoted to singing, a taste for good music is being developed, and the facility with which more difficult music is taken up is distinctly noticeable.

I desire to express my sincere gratitude to you and to the teachers, who have all shown such cheerful willingness in the work of the year.

Respectfully submitted.

FLORA M. RANDALL.
