

## Regulation of the Upton Board of Health Restricting the Sale of Tobacco Products

### **A. Statement of Purpose:**

Whereas there exists conclusive evidence that tobacco smoking causes cancer, respiratory and cardiac diseases, negative birth outcomes, irritations to the eyes, nose and throat<sup>1</sup>;

Whereas the U.S. Department of Health and Human Services has concluded that nicotine is as addictive as cocaine or heroin<sup>2</sup> and the Surgeon General found that nicotine exposure during adolescence, a critical window for brain development, may have lasting adverse consequences for brain development,<sup>3</sup> and that it is addiction to nicotine that keeps youth smoking past adolescence.<sup>4</sup>

Whereas a Federal District Court found that Phillip Morris, RJ Reynolds and other leading cigarette manufacturers “spent billions of dollars every year on their marketing activities to encourage young people to try and then continue purchasing their cigarette products to provide the replacement smokers they need to survive” and that these companies were likely to continue targeting underage smokers<sup>5</sup>;

Whereas more than 80 percent of all adult smokers begin smoking before the age of 18, more than 90 percent do so before leaving their teens, and more than 3.5 million middle and high school students smoke;<sup>6</sup>

Whereas 18.1 percent of current smokers aged <18 years reported that they *usually* directly purchased their cigarettes from stores (i.e. convenience store, supermarket, or discount store) or gas stations, and among 11<sup>th</sup> grade males this rate was nearly 30 percent;<sup>7</sup>

Whereas the Institute of Medicine (IOM) concludes that raising the minimum age of legal access to tobacco products to 21 will likely reduce tobacco initiation, particularly among adolescents 15 – 17, which would improve health across the lifespan and save lives<sup>8</sup>.

Whereas 59% of high school smokers in Massachusetts have tried flavored cigarettes or flavored cigars and 25.6% of them are current flavored tobacco product users; 95.1 % of 12 – 17 year old youth who smoked cigars reported smoking cigar brands that were flavored;<sup>11</sup>

Whereas the federal Family Smoking Prevention and Tobacco Control Act (FSPTCA), enacted in 2009, prohibited candy- and fruit-flavored cigarettes,<sup>13</sup> largely because these flavored products were marketed to youth and young adults,<sup>14</sup> and younger smokers were more likely to have tried these products than older smokers<sup>15</sup>, neither federal nor Massachusetts laws restrict sales of flavored non-cigarette tobacco products, such as cigars, cigarillos, smokeless tobacco, hookah tobacco, and electronic devices and the nicotine solutions used in these devices;

Whereas the U.S. Food and Drug Administration and the U.S. Surgeon General have stated that flavored tobacco products are “starter” products that help establish smoking habits that can lead to long-term addiction;<sup>16</sup>

Whereas the U.S. Surgeon General recognized in his 2014 report that a complementary strategy to assist in eradicating tobacco related death and disease is for local governments to ban categories of products from retail sale;<sup>17</sup>

Whereas the U.S. Centers for Disease Control and Prevention has reported that the current use of electronic cigarettes, a product sold in dozens of flavors that appeal to youth, among middle and high school students tripled from 2013 to 2014;<sup>18</sup>

Whereas 5.8% of Massachusetts youth currently use e-cigarettes and 15.9% have tried them;<sup>19</sup>

Whereas the Massachusetts Department of Environmental Protection has classified liquid nicotine in any amount as an “acutely hazardous waste”;<sup>20</sup>

Whereas in a lab analysis conducted by the FDA, electronic cigarette cartridges that were labeled as containing no nicotine actually had low levels of nicotine present in all cartridges tested, except for one<sup>21</sup>;

Whereas data from the National Youth Tobacco Survey indicate that more than two-fifths of U.S. middle and high school smokers report using flavored little cigars or flavored cigarettes;<sup>23</sup>

Whereas the Massachusetts Supreme Judicial Court has held that “. . . [t]he right to engage in business must yield to the paramount right of government to protect the public health by any rational means”<sup>24</sup>.

Now, therefore it is the intention of the **Upton** Board of Health to regulate the sale of tobacco products.

**C. Definitions:**

For the purpose of this regulation, the following words shall have the following meanings:

***Adult-only retail tobacco store:*** An establishment that is not required to possess a retail food permit whose primary purpose is to sell or offer for sale but not for resale, tobacco products and tobacco paraphernalia, in which the sale of other products or offer of services is merely incidental, and in which the entry of persons under the minimum legal sales age is prohibited at all times, and which maintains a valid permit for the retail sale of tobacco products as required by the **Upton** Board of Health.

***Blunt Wrap:*** Any tobacco product manufactured or packaged as a wrap or as a hollow tube made wholly or in part from tobacco that is designed to be filled by the consumer with loose tobacco or other fillers (regardless of content) and not to be used by the consumer as a final product.

***Component part:*** Any element of a tobacco product, including, but not limited to, the tobacco, filter and paper, but not including any constituent.
